# TECHNICAL DATA SHEET

# QH COSMOLUBRIC® B 220

FIRE-RESISTANT HFD-U HYDRAULIC FLUID

## **Applications**

QH COSMOLUBRIC® B 220 is based on high-quality, natural esters and carefully selected additives to achieve excellent hydraulic fluid performance. QH COSMOLUBRIC® B 220 does not contain water, mineral oil or phosphate ester.

# **Engineering Data**

|---|---------------|------|--|
| Hot Manifold Auto Ignition<br>Temperature (ISO 20823) | >427°C        | °C   |  |

### **The Benefits**

- Excellent lubrication properties and shear stability
- · Compatible with standard seal materials
- Readily biodegradable according to OECD 301 Methodology

# QH COSMOLUBRIC® B 220

FIRE-RESISTANT HFD-U HYDRAULIC FLUID

## Compatibility

#### Metals

QH COSMOLUBRIC® B 220 is compatible with iron and steel alloys and most nonferrous metals and their alloys. It is not compatible with lead, cadmium and has limited compatibility with alloys containing high levels of these metals. QH COSMOLUBRIC® B 220 has limited compatibility with hot dipped or electro galvanized surfaces and good compatibility with zinc containing alloys. Suitable substitutes for these materials are available and should be used.

#### **Paints and Coatings**

QH COSMOLUBRIC® B 220 is compatible with multi-component epoxy coatings. It shows limited compatibility with one component (zinc-dust containing) coatings. Specific coating and application recommendations can be obtained from coating manufacturers or directly from Quaker Houghton.

#### **Fluids**

QH COSMOLUBRIC® B 220 is compatible and miscible with nearly all mineral oil, phosphate esters and polyolester-type hydraulic fluids. It is not miscible or compatible with water-containing fluids. For conversion recommendations, please contact Quaker Houghton.

#### **Elastomers**

The following chart contains our recommendations regarding the use of QH COSMOLUBRIC® B 220 with commonly used elastomers. The elastomer applications listed are "Static," which refers to trapped nonmoving seals such as O-rings in valve sub-plates and rigid, low pressure hose connections; "Mild-Dynamic," whose applications include accumulator bladders and hose linings where the hoses are exposed to high pressure and light flexing; and "Dynamic," which refers to cylinder rod seals, pump shaft seals and constantly flexing hydraulic hose.

#### **Elastomers**

| ISO<br>1629 | DESCRIPTION   | S* | MD* | D* |
|-------------|---|----|-----|----|
| NBR         | Medium to High Nitrile<br>Buna N (Buna N,>25%<br>acrylonitrile) | С  | С   | С  |
| FPM         | Flouroelastomer<br>(Viton®)                                     | С  | С   | С  |
| PU          | Polyurethane  | С  | С   | С  |
| CR          | Neoprene  | S  | S   | S  |
| IIR         | Butyl Rubber  | S  | Ν   | Ν  |
| EPDM        | Ethelene Propylene  | N  | N   | Ν  |
| PTFF        | Teflon®   | С  | С   | С  |
|             |   |    |     |    |

<sup>\*\*(</sup>S-Static, MD-Mild Dynamic, D-Dynamic)

C = Compatible

S = Satisfactory for short term use, but replacement with a completely compatible elastomer is recommended at the earliest convenience.

N = Not Compatible

# **Safety and Handling**

Please consult the Safety Data Sheet (SDS) for information on storage, safe handling and disposal. The conditions or methods of handling, storage, use and disposal of the product are beyond our reasonable control - we assume no liability for any ineffectiveness of the product or any injury or damage, arising out of or in connection with these conditions.

All reasonable care has been taken to ensure this publication is accurate upon issue. Such information may be affected by changes subsequent to issue. This Technical Data Sheet is to be used solely for this product. Prior to any use, consult the Safety Data Sheet (SDS) for information on hazard risks and product use parameters. All liability and all warranties express or implied are hereby excluded as to product performance results, the accuracy of these data including any warranty of merchantability or fitness for any purpose. 200489
